

Running VM

VirtualBox from <https://www.virtualbox.org/wiki/Downloads> to run ATAQS and Corra VM images.

VM logins and passwords are:

Username for ATAQS: ATAQUser

Username for Corra: CorraUser

Password for both: password

Root password for both: password

Trouble shooting guides.

1. Keyboard and mouse:

Install the VirtualBox Extension Pack at <https://www.virtualbox.org/wiki/Downloads> and adding my usb keyboard/mouse in the settings in VirtualBox.

2. Starting up tomcat:

When starting up the tomcat server make sure you are running as the 'tomcat' user. The password for tomcat is also 'password' and the scripts are in /home/tomcat/apache-tomcat-6.0.32/bin.

3. Starting up mysql:

Once you have that started you can start up mysql by running this command as root:

/usr/bin/mysqld_safe & Alternatively you can have mysql running on startup by running this command as root: /sbin/chkconfig mysqld on
